Dear Folks,

Monhegan School is one of the most unique schools in this state, perhaps in the country. Remote, 10 miles off the coast of Port Clyde, our one-room schoolhouse has provided quality education to generations of children and continues as a thriving learning center for the children who live on our island.

We take full advantage of the island as a learning campus. We access the local farm's greenhouse, the many hiking trails and the very diverse residents to add to our school culture. Yet, through the power of the internet, we are well connected to other island schools and can reach across the globe to enrich our students' curricula.

Currently, we have 5 children in our school, with one full time teacher providing the wide breadth of learning opportunities for all of our children. In this age of immediate access to the whole world, this island is a treasure for families that seek that very special place to raise children and want the confidence that the education here rivals that of any school. We know from years of experience and the reports of graduates that when students move to high school off island, the Monhegan School prepared them well.

We welcome prospective families and though we follow a traditional school schedule, we would be glad to give you a tour of our lovely school and talk to you about the priceless opportunity that Monhegan offers to that very selective family. To learn more, contact me at 844-0666 or wshuttleworth@hotmail.com.

Sincerely,

William C. Shuttleworth
Superintendent
