

School System Commitment to Standards for Ethical and Responsible Behavior NEPN/NSBA Code: ADAA

The School Committee believes that promoting ethical and responsible behavior is an essential part of the school unit's educational mission. The Committee recognizes that ethics, constructive attitudes, responsible behavior, and "character" are important if a student is to leave school as a "responsible and involved citizen," as described in the Guiding Principles of the Maine Learning Results. The Committee also recognizes that Maine law requires the adoption of a student code of conduct consistent with statewide standards for student behavior developed by the Commissioner of the Department of Education in compliance with 20-A MRS § 254(11).

The Committee seeks to create and maintain a school climate in which ethical and responsible behavior can flourish. The Committee believes that instilling a sense of ethics and responsibility in students requires setting positive expectations for student behavior as well as establishing disciplinary consequences for behavior that violates Committee policy or school rules. Further, the Committee believes that in order to teach ethical and responsible behavior, adults who interact with students must strive to model and reinforce ethical and responsible behavior. To that end, the Committee supports an active partnership between schools and parents.

Recognizing that collaboratively identified core values are the foundation for a school culture that encourages and reinforces ethical and responsible student behavior, the Committee is committed to the establishment and implementation of a process for identifying shared values and setting and enforcing standards for behavior, including prescription of consequences for unacceptable behavior. The process for identifying such shared values will invite and include the participation of Committee members, school administrators, staff, parents, students, and the community. Core values will be reviewed periodically, with opportunity for public participation.

Following the identification of core values, the Committee, with input from administrators, staff, parents, students, and members of the community, will adopt a Student Code of Conduct consistent with statewide standards for student behavior¹ that shall, as required by law:

- A. Define unacceptable student behavior;
- B. Establish standards of student responsibility for behavior;
- C. Prescribe consequences for violation of the Student Code of Conduct, including first-time violations, when appropriate;
- D. Describe appropriate procedures for referring students in need of special services to those services;
- E. Establish criteria to determine when further assessment of a current Individual Education Plan (IEP) is necessary, based on removal of the student from class;
- F. Establish policies and procedures concerning the removal of disruptive or violent students from a classroom or a school bus, as well as student disciplinary and placement decisions, when appropriate; and
- G. Establish guidelines and criteria concerning the appropriate circumstances when the Superintendent/designee may provide information to the local police or other appropriate law enforcement authorities regarding an offense that involves violence committed by any person on school grounds or other school property.

The Student Code of Conduct will be reviewed periodically by the School Committee, with input from administrators, staff, parents, students, and members of the community.

Students, parents, staff, and the community will be informed of the Student Code of Conduct through handbooks and/or other means selected by the School Committee.

¹The statewide standards are the "core values" identified in the report of the Commission for Ethical and Responsible Student Behavior, Taking Responsibility: Standards for Ethical and Responsible Behavior in Maine Schools and Communities. The core values are: Respect, Honesty, Compassion, Fairness, Responsibility and Courage. The Code of Conduct must be "consistent with," not identical to, the statewide standards developed under

20 M.R.S.A. § 254(11). This provides an opportunity for communities to identify their own core values and articulate what they “look like” when applied to behavior. The core values serve as a basis for school system expectations for student conduct.

Ethics and Curriculum

The Committee encourages examination and discussion of ethical issues within content areas of the curriculum, as appropriate. The Committee also encourages school administrators and staff to provide students with meaningful opportunities to apply values and ethical and responsible behavior through activities such as problem solving, community service, peer mediation and student leadership development.
