

Monhegan School video conferencing equipment is provided primarily for educational uses consistent with the school's educational mission. Secondly, it is provided for uses benefiting the Monhegan community as a whole, with Monhegan Plantation having priority over Monhegan-based non-profit organizations and other Monhegan community organizations. At the discretion of the School Committee, the equipment may be used at other times, if circumstances permit, by small groups or individuals, for non-commercial or commercial uses. Non-school uses shall not interfere with school activities.

All users are expected to comply with the specific policies, rules, expectations, and instructions for use provided by school personnel or others designated by the School Committee to manage equipment use.

The School Committee shall establish each year a schedule of fees for use of the equipment, to cover technical assistance, electricity use, custodial services, and other expenses associated with provision of the equipment.

As all use of the video conferencing equipment takes place within the schoolhouse, policies, rules, and any fees for schoolhouse use shall apply.
